2968 FERTILIZER OPENER

Achieve consistent off-the-row placement for starter or liquid fertilizers

- » Available as a dual- or single-wheel opener
- » Make quick adjustments between placement locations; options are 2" or 3" off the row
- » Utilizes a 10" disc to open fertilizer slot
- » Adjust depth quickly with cordless impact or wrench
- » Disc is located behind gauge wheel, eliminating fertilizer and damp soil buildup on gauge wheel
- » Allows the use of other attachments on the front of the row unit
- » Fits mounted and pull-type planters
